De-Snaring Report for April, 2012

Monthly Summary

The KWS suspension of the DSWT Teams operation in the National Park was still upheld during April. Despite the fact that there were no desnaring activities taking place, the team remained busy by supplying water to the three groups of road clearing casuals. The Team is helping with the management of carving new roads & re-opening old roads in the Northern part of Tsavo East NP. These roads will be of huge help to DSWT & KWS when operating on the ground in order to reach impenetrable areas which are poaching hotspots. The Team request that these roads be graded as they are still very rugged and thus the wear and tear on the vehicle is high.
